

EUROPAFILTER

KEEP IT CLEAN

3 YEAR SERVICE KIT2050

Europafilter is a kidney unto your oil system. It ensures operational reliability of machines. To ensure an optimal function of the EF2050 filterhousing onto the Europafilter oil cleaner system, internal parts within this kit must be changed to upkeep the integrity.

We do recommend that the Europafilter EF500HY insert is changed as well when performing the service of the EF2050 filter housing.
